... visual panache.

This book takes a different and possibly dangerous route to learning how to **design Web pages**, however. Though it rambles on about the Web for roughly 60 pages, it does not...

...coding basics. Rather, it sets out its "cooking lessons" with premade "recipes," or Web page **templates**, which are both in the **book** and on an accompanying CD-ROM disc. You see how they're assembled, add your...

...The specific "ingredients" (text, headings, links, menus, pictures, etc.) are covered in separate detail. The **book** then goes on to describe even more "nutritional" text, graphics, sound, and video additions, as well as the "haute cuisine" of **forms**, maps, and tables. Perhaps most interesting, there are **several** chapters on **page** presentation and designing for an international audience.

The dangerous part is that it's easy...

...for mobile professionals (C)1994-98 M2 COMMUNICATIONS LTD RDATE:290498 *
New version of Lotus **Pager** Gateway extends Domino to rapidly growing handheld computing market At EMA'98, Lotus Development Corp. today announced the shipment of the Lotus **Pager** Gateway Release 2.02 with Wireless Domino Access. This packaged offering extends the reach of Lotus Notes and Domino to millions of users of **paggers** and voice/data cellular phones, such as those offered through AT&T PocketNet service. Today...

...of mobile professionals who use handheld devices need to access their e-mail, calendars, address **books**, and applications stored on corporate servers," said Eileen Rudden, senior vice president, Lotus' Communications Products...

...quickly and make better decisions faster." Wireless Domino Access Increases Devices Supported by Domino Lotus **Pager** Gateway Release 2.02 is a server-based solution that allows Notes users to send e-mail messages directly to one- and two-way **paggers**. New to Release 2.02 is Wireless Domino Access, a stand-alone solution included in the **Pager** Gateway package that enables Notes users to access their Domino server-based Notes Mail, Calendar...

...directly from their voice/data cellular phones over wireless IP network services. Future support for **Pager** Gateway with Wireless Domino Access is planned for handheld devices with wireless modems, such as 3Com's PalmPilot and IBM's WorkPad. With the **Pager** Gateway Release 2.02, individual users can manage how, when, and where they receive messages. Users can create agents easily to send messages to **paggers** when Notes databases are updated or e-mail messages are received. For example, a potential customer can **fill in a form** on a company's **Web site** requesting more information on a product or service. Upon submission of the **form**, the **Pager** Gateway can send a message automatically to the appropriate salesperson's **pager** for immediate response. In addition, **Pager** Gateway creates a Domino-based **Web site** that allows external, non-Notes users to send messages to **pager** users from Web browsers. System administrators can easily configure the **Pager** Gateway to work with multiple local, regional, or national paging services. Wireless Domino Access has been added to the **Pager** Gateway package and provides several capabilities to users of voice/data cellular phones. With Wireless...

...messages, compose and send responses, search for messages according to the sender, subject, and date **fields**, and send messages to a fax machine for printing. Users also can check their calendars...

...connectivity combined with wireless access to their e-mail, office

calendar, contact manager, and an array of other online information. AT&T PocketNet service is available in more than 70 of...

...able to provide today's business people with the tools and information that increase an organization's ability to be more highly mobile at the same time that it is more...

...alerted to urgent issues," said Brian Rowe, president, Cobra Technologies, a Lotus Premium Business Partner. "Pager Gateway with Wireless Domino Access allows us to meet our customers' mobile needs by leveraging...
...extend and enhance their messaging infrastructure. The ultimate benefit is a substantial improvement in their organizational effectiveness." Lotus Developing Mobile Services for Domino Pager Gateway Release 2.02 with Wireless Domino Access is the latest mobile and wireless product...

...and wireless solutions from Lotus offer these functions to Notes users today. In addition to Pager Gateway with Wireless Domino Access, Lotus recently shipped EasySync Release 2.0 for Notes, which...Partners understand Lotus' mobile and wireless strategy and learn how to install, configure, and tailor Pager Gateway 2.02 with Wireless Domino Access, as well as EasySync for Notes. More information...

...can be found at <http://partners.lotus.com/zone.nsf>. Pricing, Availability and System Requirements Pager Gateway Release 2.02 with Wireless Domino Access is available immediately from Lotus Business Partners for an estimated retail price of \$3,058. Pager Gateway 2.02 with Wireless Domino Access requires a Pentium or faster PC with at least 64 MB of RAM, Microsoft Windows NT Workstation 4.0 or later, Domino Server Release 4.54 or later. Systems running Pager Gateway 2.02 require 60 MB of free disk space (in addition to the Domino...

...Hayes-compatible modem, at least one wireline analog phone line, and one alphanumeric or numeric pager and access to a commercial paging service. Wireless Domino Access requires 4 MB free disk...

...the Domino server, and an Directory available on the Domino server running Wireless Domino Access. PagerGateway uses the Telocator Alphanumeric Paging (TAP) protocol and is certified to work on most paging service provider networks, including American Paging, ProNet Communications, Metrocall, PageMart Wireless, PageNet, SkyTel/MTel, AT&T Wireless, and Arch. Voice/data cellular phones accessing Domino databases must...

...for mobile professionals (C)1994-98 M2 COMMUNICATIONS LTD RDATE:290498
-- New version of Lotus Pager Gateway extends Domino to rapidly growing handheld computing market At EMA'98, Lotus Development Corp. today

announced the shipment of the Lotus **Pager** Gateway Release 2.02 with Wireless Domino Access. This packaged offering extends the reach of Lotus Notes and Domino to millions of users of **paggers** and voice/data cellular phones, such as those offered through AT&T PocketNet service. Today...

...of mobile professionals who use handheld devices need to access their e-mail, calendars, address **books**, and applications stored on corporate servers," said Eileen Rudden, senior vice president, Lotus' Communications Products...

...quickly and make better decisions faster." Wireless Domino Access Increases Devices Supported by Domino Lotus **Pager** Gateway Release 2.02 is a server-based solution that allows Notes users to send e-mail messages directly to one- and two-way **paggers**. New to Release 2.02 is Wireless Domino Access, a stand-alone solution included in the **Pager** Gateway package that enables Notes users to access their Domino server-based Notes Mail, Calendar...

...directly from their voice/data cellular phones over wireless IP network services. Future support for **Pager** Gateway with Wireless Domino Access is planned for handheld devices with wireless modems, such as 3Com's PalmPilot and IBM's WorkPad. With the **Pager** Gateway Release 2.02, individual users can manage how, when, and where they receive messages. Users can create agents easily to send messages to **paggers** when Notes databases are updated or e-mail messages are received. For example, a potential customer can **fill in a form** on a company's **Web site** requesting more information on a product or service. Upon submission of the **form**, the **Pager** Gateway can send a message automatically to the appropriate salesperson's **pager** for immediate response. In addition, **Pager** Gateway creates a Domino-based **Web site** that allows external, non-Notes users to send messages to **pager** users from Web browsers. System administrators can easily configure the **Pager** Gateway to work with multiple local, regional, or national paging services. Wireless Domino Access has been added to the **Pager** Gateway package and provides several capabilities to users of voice/data cellular phones. With Wireless...

...messages, compose and send responses, search for messages according to the sender, subject, and date **fields**, and send messages to a fax machine for printing. Users also can check their calendars...

...connectivity combined with wireless access to their e-mail, office calendar, contact manager, and an **array** of other online information. AT&T PocketNet service is available in more than 70 of...

...able to provide today's business people with the tools and information that increase an **organization**'s ability to be more highly mobile at the same time that it is more...

...alerted to urgent issues," said Brian Rowe, president, Cobra Technologies, a Lotus Premium Business Partner. " **Pager** Gateway with Wireless Domino Access allows us to meet our customers' mobile needs by leveraging..."

...extend and enhance their messaging infrastructure. The ultimate benefit is a substantial improvement in their **organizational** effectiveness." Lotus Developing Mobile Services for Domino **Pager** Gateway Release 2.02 with Wireless Domino Access is the latest mobile and wireless product...

...and wireless solutions from Lotus offer these functions to Notes users today. In addition to **Pager** Gateway with Wireless Domino Access, Lotus recently shipped EasySync Release 2.0 for Notes, which...Partners understand Lotus' mobile and wireless strategy and learn how to install, configure, and tailor **Pager** Gateway 2.02 with Wireless Domino Access, as well as EasySync for Notes. More information...

...can be found at <http://partners.lotus.com/zone.nsf>. Pricing, Availability and System Requirements **Pager** Gateway Release 2.02 with Wireless Domino Access is available immediately from Lotus Business

Partners for an estimated retail price of \$3,058. **Pager** Gateway 2.02 with Wireless Domino Access requires a Pentium or faster PC with at least 64 MB of RAM, Microsoft **Windows** NT Workstation 4.0 or later, Domino Server Release 4.54 or later. Systems running **Pager** Gateway 2.02 require 60 MB of free disk space (in addition to the Domino...
...Hayes-compatible modem, at least one wireline analog phone line, and one alphanumeric or numeric **pager** and access to a commercial paging service. Wireless Domino Access requires 4 MB free disk...

...the Domino server, and an Directory available on the Domino server running Wireless Domino Access. **PagerGateway** uses the Telocator Alphanumeric Paging (TAP) protocol and is certified to work on most paging service provider networks, including American Paging, ProNet Communications, Metrolcall, **PageMart** Wireless, **PageNet**, SkyTel/MTel, AT&T Wireless, and Arch. Voice/data cellular phones accessing Domino databases must...

...users to access and communicate information in ways never before possible, both within and beyond **organizational** boundaries. Lotus now markets its products in more than 80 countries worldwide and provides numerous...

...NOTE: All Lotus news releases are available on the Internet, via the Lotus Development Corp. **Home Page** at <http://www.Lotus.com>. The Lotus **Home Page** is an easy way to find information about Lotus and its business partners' products and...

RECORD TYPE: Fulltext; Abstract

TEXT:

... not just an isolated box on a table, but part of the larger environment of **books**, videos, paper and pencils teachers, other students, and curricula; some of which may be crucial...

...be necessary for describing computer system-level issues; i.e., how media resources are stored, **organised** and delivered to learners. Other levels will be needed for describing education considerations; i.e...

...categories for describing and analysing educational multimedia applications-delivery and use platforms, software issues, resource **organisation**, task syntax, task semantics, teaching strategies and educational aims (see Table I). We have **organised** these categories into layers to emphasise how design decisions made at lower levels affect what...

...at the end of this report. Generally speaking, the lower three levels (platforms, software, resource **organisations**) describe system-level media management issues and the upper levels (syntax, semantics, strategies and educational aims) describe how media can be used to provide different **forms** of educational support. In practice, we shall see in our examples later on, not all...

...personal learning goals, institutional or professional curriculum requirements, and socially accepted practices in a particular **field** (Brown et al., 1989; Lave, 1991; Sachs, 1995). For our purposes, we define educational systems (as...by these activities, and (3) efforts to relate the activities to other learning materials or **fields** of study. Let's consider each of these parts in turn. (Table Omitted) Captioned as...

...as important as the design of the instructional materials; i.e., how the materials are **organised**, explained, and presented (Kintsch et al., 1995). At this level, we need to note what...

...system. Are learners watching nature videos, listening to musical selections, comparing two law cases, taking **field** notes, analysing specimen or solving mathematical problems? Specifically, we need to focus on verbs...

...enculturation and participation in the joint efforts of social groups. An example in a **field** related to mathematics is the use of the PuckLand system by small groups of students...in a system, efforts to relate the material being studied to other learning materials or **fields** of study should be characterised. At a practical level, if systems refer to other materials such as **books** or videos, then students need access to these or substitute materials. If systems systematically refer to related **fields** that students have no knowledge of, then supporting materials providing this information will be needed. At a theoretical level, it is important to make connections across different domains and **fields** of study. First, such interdisciplinary connections help learners to see the broader context and importance...

...is to introduce students to some of the observation and note-taking skills required in **fieldwork**, relating this activity to that engaged in by Darwin in his exploration of Galapagos. The...

...videos of expert commentary on important sub-topics, enter data into a spreadsheet representing their **field** notes, compute simple statistics from their data using the spreadsheet, closely examine pictures of finches...

...between behaviourism and constructivism-students are using skills in a simulated environment that resembles a **field** trip, and they must draw together their findings to reach conclusions about various issues presented...

...to language, and an important part of language is the interplay between

meaning (semantics) and **form** (syntax). Similarly, we use these terms to emphasise that the process of understanding what to...semantics.' The task semantics learners need to know reflect important properties of the domain or **field** being studied. These properties can include critical perceptual and conceptual skills for recognising formal **arrangements** (Durbridge & Stratford, 1996), procedural skills for decomposing tasks and taking actions (Shanck & Jona, 1991), problem...

...previous cases to compare with' (Kolodner, 1993; Nakakoji & Fischer, 1990), socially-accepted practices in a particular **field** (Brown et al., 1989; Lave, 1991) and important declarative knowledge. Understanding the knowledge and skills learners need in a given situation requires knowledge of the domain or **field** being studied, experience in instructional design, and some understanding of the principles of cognition and...

...of instructional design has traditionally involved careful consideration of how information should be broken up, **organised**, and presented to the learner. This emphasis on structuring arose from the dominant educational model...

...by, and recapitulated in, serial modes of presentation in existing teaching media (i.e., written **books**, spoken lectures, audio tapes, videotapes). Using these media in transmission mode, the challenge for designers was taking complex structured and interrelated information and rendering it into a meaningful, serial **form**. With the advent of hypermedia, we are no longer confined to creating educational materials for...

...presentation. Indeed, multimedia systems now reflect the structures and interconnections important to a particular **field** or domain (Fischer, 1994a). Such 'hypermedia' systems can support learners to follow links to related...available to be explored. Task decomposition are basically 'to do' lists and come in many **forms**, such as checklists (Lem & Fischer, 1990) and agendas (Sumner & Taylor, 1998; Wroblewski et al., 1991). The Galapagos system also employs a **form** of task decomposition in its help system (see Fig. 6). Some systems, such as general...

...to help novice students accomplish complex tasks. When analysing systems at this level of the **framework**, note the **various** structuring devices employed by the system and try to determine if they will be adequate...

...designers tend to focus on their system-oriented areas of expertise-user interface design, resource **organisation**, and hardware and software issues. It is in this vital area of providing support for...

...and Galapagos are both unique island communities and how each are prototypical examples of particular **forms** of island ecosystems. Selecting Galapagos begins the following sequence of activities: Episode 1. Looking. The...map. Successive screens then pose a series of questions which students answer by selecting from **multiple** choice response **boxes**. Episode 3. Looking. Encouragingly, the narrative line now takes over again - talks about how Darwin made mistakes when he was a young **field** biologist. Further stunning photo-images of birds are shown as a prelude to the task...

...the person who actually recognised the birds as finches. From the tiny shrivelled scraps of **field** specimens Darwin brought back to England, Gould produced impressive lifelike paintings which we are shown...

...the earlier ones aided by a video clip talking about the importance of **field** work, and an essay on Religion and Evolution. The next section asks students to use...

...have just seen and heard. Each SAQ is answered by choosing from a selection of **multiple** choice **boxes**. The system discourages users from advancing without answering the questions. As SAQs asking more difficult ...

...are given encouragement through periodic reminders of Darwin's many mistakes in his early attempts at **fieldwork**. ' ' Level 4: task syntax ' ' The task syntax level is the one at which the user...

...are available, and provides mechanism' for searching, browsing, collating, inspecting, annotating, or watching the' multiple **forms** of media. In so doing, the provided affordances encourage us' to behave in certain ...specific' information in a large information space. Thus, an encyclopaedic format' encourages and supports rich **forms** of searching and perhaps limited **forms** o' browsing to help find related information. Other interface mechanisms are m' task or domain...

...with it. Learners in this situation will not need to avail' themselves of a complex **array** of tools as did the independent learners,' because the decision-making process has been done...

...entrancement,' specific subject matter, or particular teaching points. This in turn means' that the screen **organisation** must be simplified and designed so as not to b' intimidating to a new user...

...consideration is given to the target user population's needs and expectatio' ' Level 5: resource **organisation** ' ' All computational systems have formal structure at the machine level-data o' information in computers understanding how' resources are **organised** in the system. Ideally, resources are **organised** ' intelligently to maximise the kind of interface we want our multimedia syst' to have, to...

...the' system?' ' As the last question indicates, we want to take a user-centred perspective ' **organisation** rather than a developer-centred perspective because the two ar' not always the same. That...
...to describe what they are doing which has only apparent' consensus-words such as 'structure', ' **organisation** ', 'access', 'file' and s' on may tacitly be taken by all team members to refer...

...of a nice navigation mechanism that also direct' supports the task semantics.' ' Level 5: resource **organisation** ' ' The structure of the Galapagos Pilot is hierarchical. Each rectangle in Fig' represents a page ...

...audio clips of the ongoing narrative. The diagram as a' whole represents a typical page **organisation** within an episode. As you can' see, the pages are **organised** in a linear fashion during 'looking' sessions,' with a small amount of branching at the...

...applications. Some environments, such as DirectorTM, ToolbookTM and' mTropolisTM, are better suited for more presentational **forms** of multimedia.' Other more general purpose programming languages, such as C++ or Visual' BasicTM, may...t' multimedia system. True multimediararity often breaks out of the electronic' domain to encompass ancillary **forms** of learning materials, be they spoken,' written, audio, or video. Some systems are intended to...

...credit the package's strong narrative line for the overall positi' response. This very strong **form** of task semantic support appears to be' well-suited for the needs of this target...is to give students a feel for the' observation and note-taking skills involved in **fieldwork**. However, as our v' analysis from level 2 indicates, the task being done is one...

...window. It is not surprising that students foun' this tedious and seemingly unrelated to meaningful **fieldwork** activities.' Clearly, this task should be redesigned to better reflect the educational' aims.' ' Another, related...

...areas often required watching everything all over again.' ' This difficulty indicates that the current resource **organisation** (level 5)' should perhaps be reconsidered. At the moment, the package is extremely' linear, with...

...some way of directly access' the start of each different episode.

Indeed, flattening the overa **organisation** , and providing some overview maps, may help students develop a 'comprehensible overview of the material ...

...to the 'task semantics. Similarly, educational goals will have very little direct 'connection with the **organisation** of resources, except via the teaching 'strategies/task semantics/task syntax hierarchy.' ' In addition to...

...reminds us that any learn 'situation has components which need to be present in some **form** or other for 'the desired educational experience to occur. If the learning is to be...Media in Education, 96(1),' http://www-jime.open.ac.uk/jime/Oll_jime-01.html .' ' Reference: ' ' FISCHER, G. Innovative tools and 'Webware' will help the Internet live up to its potential

REALITY CHECK

Byline: Thomas Nolle

Journal: Network World Page Number: 48

Publication Date: May 29, 1995

Word Count: 942 Line Count: 85

Text:

... Net uses that may not have occurred to them before. According to studies that my **organization** and a commercial Internet services provider have conducted independently of one another, more than 90...

... with the results. They envision millions of happy Internet surfers seeking out their company's **home page**, yet they don't get their page cataloged or indexed. Finding things on the World...

... used it knows, consists of clicking through various resource locator words and icons. If your **home page** isn't linked to a part of the Web that users already surf through, they...

... it's also true that software companies are eagerly working to simplify Internet use, and **books** and guides are being published every week to educate ``newbies'' on the issues. In time...

...delivery capability than most groupware had two or three years ago. With improvements in handling **forms** and structured data, we could easily build corporate information systems using Internet software tools and...

... replace groupware or become the next generation of groupware. Using the HyperText Mark-up Language (**HTML**), a viewer software element can be provided for virtually any information **format** used in a **Web page**, from structured databases to video. Anyone who doubts **HTML**'s value should try writing **HTML** pages using WordPerfect or Microsoft Word, both of which have **HTML** capability. You can build a companywide information distribution system that can be accessed with the...

... Internet information resources. You don't even need a TCP/IP server or stack; the **HTML** document can be transmitted over redirected disk connections through any network operating system. The arrival...

...IP, will cause the number of TCP/IP clients and servers on PC LANs to **multiply**. In fact, **Windows 95** will do more to popularize TCP/IP and the Internet than the industry pundits...

... to be seen, but it will change the face of workgroup computing completely. Writing an **HTML** page or information system is a great way to tinker with the anatomy of the...

... the power of the Internet as an information source. Every user with access to an **HTML**-capable text system or word processor should try it - not just to prove the value...

TEXT:

...but rather about the impact of Internet based technologies on businesses, their systems and their **organization**. These technologies are largely internal and 'semi-internal' systems, such as intranets and extranets, and systems for supporting the automation of customer relationships. All of these, he says, **form** part of what he calls the

"third wave of computing", the wave of customer automation...

...of the back office in the late '70s and '80s and the front office and **field** tasks in the late 80's and in this decade. And, Gens believes, the third...

...messages with close business partners - is that customers are invited to enter, usually through a **Web site**, into a company's operational systems and conduct a number of transactions such as ordering...

...says. The key is to effectively and seamlessly link back office systems with the new **Web - based** front-end systems. Already, consultants and systems integrators are excited by the prospects, and are...

...for trading with partners using EDI. EDI involves establishing direct computer-to-computer links between **organizations** over wide area networks - for example, for the exchange of sales orders, invoices, technical documents...

...overlooked, but is arguably the most important. It comes straight from the top - from large **organizations** that have traditionally been willing to spend tens of millions building their systems. These **organizations** (such as banks and airlines), and their hardware and software suppliers, know how to ensure...

...always communicate, and that everything can be rolled back when things go wrong. In large **organizations**, tying these technologies together is a substantial task, but much of the infrastructure is already...supplier of networking equipment, is an example. It has set up a link from its **Web site** into its ordering system, allowing customers to configure and order products online. The process was...

...management data, such as the number of attempted accesses to pages. Colin Hume, a software **designer** experienced in linking **Web sites** to back end trading systems, nevertheless warns small companies that using an ISP is a...

...server is difficult." It should not be compared with the easier job of maintaining a **Web site**, he warns. BIG IS HARD But for those companies that already have a substantial back...

...back-end system. One of its primary tasks is to mesh hypertext mark up language (**HTML**) pages for the Web with the various business applications and SQL databases. This can be...

...back-end systems, and on the need for real time transactions. Typically, the appropriate data **fields** from the business application are routed through a common gateway interface (CGI) and translated using scripting language into **HTML**. Alternatively, specialized interfaces may be developed. There are many hurdles to overcome in developing such...

...which are featured on every browser. These allow the user to move around on the **Web site** - but if a customer is allowed access to a back-end application and starts hitting...

...linked in real time to operational systems may ultimately prove to be higher than many **organizations** had expected. But despite this, there are some major factors driving investment - with staff savings business processes. In 1995 it set about building a **Web - based** extranet, a network accessible only to chosen partners, called the Trading Process Network (TPN) and...

...has been virtually eliminated," says Hare. Suppliers are now notified of contracts via the TPN **Web site** and invited to put in tenders via the site. Before TPN, the average number of...

...the database vendors have developed a variety of specialist tools, including those to translate SQL **forms** to **HTML**, and to support browser-type clients. Third, the big applications vendors, such as SAP,

Oracle...

...application development tool vendor Speedware, for example, launched a software package late last year - Orderpoint - **designed** to create a **Web based** ordering system. The product is on its third release - and significantly, is now only targeted...

...for Windows NT to include tools to build and manage content in both databases and **Web sites**. And Informix has released a raft of Web-enablement products under the title Universal Web...

...According to Dennis Keeling, a business software consultant with Ovum, this is because many large **organizations** are still unready to automate customer interfaces. Many products from large suppliers have yet to...

...getting locked into a proprietary browser technology. For example Netscape's enterprise server, which generates **HTML** pages for a **Web site**, uses proprietary **HTML** tags, not those conforming to the standards set by the Worldwide Web Consortium. This could...

...reshape how buyers and sellers interact. Michael Sullivan- Traynor, industry analyst and author of a **book** Cyberquake which attempts to map out the landscape of an automated society 25 years from...customer' is more complex than simply translating from an existing screen access method to an **HTML** browser. Here are some of the problem areas: * Transactional systems may have time delays built in. If a customer fills in half a **form** then takes a phone call, it may disrupt the transaction. * If a customer wants to go back and change data after progressing through **several pages**, the 'back button' on the browser may have no equivalent in the database. * Is there...

...accepts an order that the company cannot fulfil? * Is the system reasonably secure from all **forms** of malicious attack, and how would it deal with repeated accesses by a competitor or...
